Raising the Bar in Community Care, Home and Abroad

**David H. Hildreth, MD | Richmond Bone & Joint Clinic
Sugar Land, Richmond, Katy | 281-344-1715 | davidhildrethmd.com**

Orthopedic specialist Dr. David Hildreth has trained many of Houston's top hand surgeons and today is sought for his cutting edge treatment of some of the most common as well as specialized hand, wrist and elbow injuries, and conditions prevalent in our society.

An associate professor at Weill Cornell University, Dr. Hildreth is board certified by the American Board of Orthopaedic Surgery with Certificate of Added Qualifications (CAQ) in Surgery of the Hand and is among the first in Texas to

perform the new needle aponeurotomy procedure for Dupuytren's Contracture. He has led research studies affecting the treatment options available for hand, wrist and elbow conditions experienced by young athletes and the elderly alike in our active society—and today offers the newest techniques in minimally invasive arthroscopy, endoscopic carpal tunnel release, and joint resurfacing and replacement.

Dr. Hildreth was part of one of the early response teams providing critical medical care to earthquake victims in Haiti.

Dr. David Hildreth (R) joins the transport team on the ground in Haiti weeks following the devastating earthquake.

- Endoscopic Carpal Tunnel Release
- Needle Aponeurotomy for Dupuytren's Contracture
